*Make your fragrance last longer!*

**Take a shower before applying**

To make your fragrance last longer and brighter, spray it on dry skin right after shower or bath.

**Moisturize your skin**

Make your perfume last even longer, apply the fragrance after moisturizing your skin. With unscented cream or body lotion of the same scent.

**Choose the right points**

Pulse points such as wrists, neck, behind the ears are some of the best place to apply perfume, helping fragrance sound brighter and louder.

**Don't rub your wrists**

Rubbing your wrist after spraying fragrance can make your perfume fade quickly as rubbing makes the top notes disappear faster.

**Don't spray on clothes**

Spray directly on skin, not on clothes, as fragrance can leave some stains. Only put on your clothes after ensuring your perfume dries on the skin.
